

Drawing corrections:

- ✚ Confirmed wire colors at the stop light switch ("Brake pedal sw.")
- ✚ Added the missing System Test switch and the amber LED next to K6
- ✚ Added the missing teflon strip symbol data for the five connections between:
 - Ignition switch power input (brown) wire connects to Ignition ON-OFF Module
 - Ignition switch "ACC" output line (wht/pnk) connects to K4 output contacts
 - Ignition switch "ON" output line (white) connects to K3 output contacts
 - Ignition switch "Start" output line (wht/yel) connects to K1 output second contacts
 - Chassis ground
