

## Britax early safety belts for Jaguar

Britax introduced their first automatic safety belt in 1963. We noticed three different systems over the years:

- Auto-lok
- Lifelok
- Surelok (mid 70s)

**Britax**  
"TERYLENE"  
**AUTOMATIC SAFETY BELTS**

*The World's most advanced design*

This free-moving, self-retracting belt does not restrict your movement in any way—until some violent movement of the car brings the 'AUTOLOK' device into operation. On hard braking, impact or sudden swerving, the belt reel is firmly locked, holding you securely in your seat. In addition to the famous Britax features it offers you these advantages:—

- ★ Complete freedom to move
- ★ Instant safety belt protection in emergency
- ★ Automatic adjustment
- ★ Actuated by car's movement

**This is the BRITAX AUTOLOK Reel** PATENT APPLIED FOR

The simple, robust Autolok device operates automatically, locking this reel a split second before a normally relaxed driver or passenger would start leaving the seat.

**Price List:**  
AUTOMATIC TWO POINT DIAGONAL **£5.15.6**  
AUTOMATIC THREE POINT LAP AND DIAGONAL **£6. 6. 0**

Available in  
DOVE GREY · HAWAIIAN BLUE  
MIDNIGHT BLACK · HONEY BEIGE · FLAME RED  
COPPER TAN · PEARL WHITE

**Britax**  
"TERYLENE"  
**STATIC SAFETY BELTS**

For those who prefer a static belt, BRITAX offers a choice of Lap and Diagonal or Diagonal types. These are the most widely used and thoroughly proved belts, and incorporate these Britax features:—

- ★ Quick-release buckle with fingertip adjustment for length of belt
- ★ Easy to loosen and re-tighten with one hand when reaching forward or sideways
- ★ Designed and engineered to fit your car
- ★ Anchored to the frame of your car for maximum security

**BRITAX 3 POINT LAP AND DIAGONAL SAFETY BELT**  
Combines the correct restraining action of a diagonal belt with a lap strip to give extra support to the lower part of the body.  
**£4.14.6**

**BRITAX 2 POINT DIAGONAL SAFETY BELT AND BRITAX REAR SEAT DIAGONAL BELT**  
The simplest type of belt providing correct support to the body and preventing "jack-knifing".  
**£4.4.0.**

- ★ A recent Road Research Laboratory Report showed that the wearing of safety belts reduces your risk of injury in road crashes by 79%.
- ★ BRITAX Safety Belts have been proved by practical experience in the severest road crashes.
- ★ All BRITAX Belts, Automatic and Static, are approved to British Standards.
- ★ Positive metal to metal buckle with fingertip adjustment.
- ★ 100% Terylene webbing of immense strength and controlled stretching.
- ★ Anchored entirely independently of the seat to the frame of the car.
- ★ Approved by leading car manufacturers. Safety Belts manufactured by Britax are selected for fitting to their cars by these makers amongst others—B.M.C., Vauxhall, Standard-Triumph and Jaguar.

Here is just a short list from the comprehensive range of BRITAX Safety Belts obtainable.

**AUTOMATIC TYPE**

DSB.802/3PA All cars with 7/16" Anchorage Points.  
DSB.801/3PA To most other cars.

Later Auto-Lok system (possibly 3<sup>rd</sup> generation)

### Original Jaguar MK2 Britax Lyfe Lock Seat Belt Buckle with Chrome Catch

This is a genuine, original buckle for a Jaguar Mk2, using the chrome lift release catch. It is a Patented "Lyfe Lock", made by Britax of Surrey. It is a genuine, used item and has been stored some years. The Terylene Webbing has no fraying and is in very good condition, other than requiring a clean. The bottom hook fitment has some surface rust and the hook will require some attention. The chrome clasp works perfectly, but has some indentations to the front and some surface corrosion within the bevels on the rear and the side. The side switch does not move and may require someone with either stronger fingers than myself or some WD40.

### Static 3-point seat belts
